Just the right size for small containers on the window sill.

General assortment of 25 or more varieties of succulents \$ 1.25 prepaid.

Better varieties, labeled with scientific, or when available, popular names,

Carton Deluxe \$ 2.25 prepaid.

Sticky ones - true Cacti - only, 25 exotic varieties, 2.75 per carton.

Sample box of 12 different Succulents for 75c prepaid.

### Short planting and growing instructions:

These plants above all need light. Given that, and when planted in a light, sandy soil with a good drainage they will be a continuous source of pleasure to a plant lover.

Two parts of sand, one part of well decomposed leaf mold and one part of garden loam will make as a rule a satisfactory growing mixture. When planting have this pleasingly damp to touch. Fill your container, put  $\frac{3}{4}$ " to  $\frac{1}{2}$ " of clean sand on top, and plant. Before planting trim all damaged or broken roots. In case of a rare or valuable plant dip the roots in plant hormone powder.

Watch your plants for possible enemies: Aphids on some succulents, scales or mealies on cacti. Commercial preparations will protect your plants.

With probably one or two exceptions our plants are not hardy to withstand rigor of eastern winters outdoors.

- CACTI -

<u>Golden Peanut Cactus.</u> ( <i>Chamaecereus silvestrii forma aurea</i> ) rare, bright yellow.	25c
<u>Crested Peanut Cactus.</u> grafted on <i>Cereus peruvianus</i> .....	50c
<u>Miniature Grafts.</u> Rare, mostly globular Cacti, grafted on <i>Cereus peruvianus</i> .	
Unusual, odd, in assortment of six, all different.....	\$1.25
<u>Echinopsis calochlora.</u> Shiny bright green plant, white flowers.....	25
<u>Echinopsis eyresii.</u> Dark green, white flowers .....	25
<u>Echinopsis multiplex.</u> Old fashioned Easter Cactus pink blooming. ....	25

Cactus assortment.

From the above and other fine varieties we have put up an assortment of 25 Cacti all different, all types, nearly all of Central and South American Origin. These 25 species will form a comprehensive basic collection of Cacti. An attractive carton will make a nice gift on birthday, anniversary or any other occasion. Educational for children and students, joy for shut-ins, these plants can be grown on a sunny window sill or similar location. Price \$ 2.25 prepaid.

Aloe - Gasteria - Haworthia.

Aloes: Most of our Aloes belong to larger types. Supplementary list will be sent to those interested on request.

Gasterias: Curious plants with dark green, reddish brown or otherwise colored leaves, often beautifully marbled, spotted or covered with tiny pearl like tubercles. Mature plants produce in spring spikes of tubular, coral red flowers. We recommend following distinctly different true species:

G. acinacifolia - excelsa, our best Gasteria, 50c each - caespitosa, dwarf, very pretty - obtusifolia, very wide, dark, leather like leaves. - verrucosa, nice, pearly like type. - nitida, very shiny, smooth, dark green. - black beauty, very dark, nearly black, without marking. Prices, unless marked otherwise, 25c ea.

For dish garden work etc.: We have an assortment of multicolored Gasterias not labeled, mixt 12 all different for 75c.

Haworthias: Here belong some of the most satisfactory indoor plants. Requiring little space, they are not so much exacting as to light, relatively free from pests, and we offer them in pleasing variety of forms and colors. We divide them roughly in three groups: Window, rosette and columnar Haworthias.

Window types: More or less green varieties, often semitransparent or translucent markings on top to admit more light inside the plant. Following varieties are available at this time:

bilineata - cuspidata - denticulata - tesselata - tenera major - cymbiformia - integra - planifolia - pilifera - ryderiana - turgida - turgida hybrid. 25c each.

Haworthia hurlingii and retusa 50c each.

Dark rosette types:

margaritifera - fasciata - granata - metallica - skinnerii - papillosa. 25c each  
Haworthia limifolia - tuberculata - "Copper Rose" at 50c each.

Columnar types:

reinwardtii - chalwinii - resendeana - viscosa - eyliae - coarctata - tortuosa.

Apicra: Similar to Haworthia differing principally in the structure of flowers. Apicra pentagona and Apicra spiralis, 25c ea. Apicra foliolosa, 50c each.

Similar in aspect and growing habit are following interesting plants:

Dyckia sulphurea .....	25c	Puya alpestris .....	25c
Gasteraloe pethamensis .....	25	Gasteraloe sp. # 1 .....	25
Aloe beguinii .....	25	Gasteraloe sp. # 2 .....	25
		Aloe aristata	25c.

Aloe - Gasteria - Haworthia assortment.

From the above on this page we have assembled a comprehensive basic assortment of 25 better varieties. Every group listed above is represented in this collection. Price for 25 all different plants \$ 3.50
